

ANNUAL REVIEWS

CONNECT WITH OUR EXPERTS

November 1, 2025

Dear Hernan Enrique Noriega Barros,

The *Annual Reviews of Nuclear and Particle Science* Editorial Committee has now met and has chosen the winners of the Video Contest. Congratulations, we have awarded you and Bernardita Reid Guachalla the First Prize!

We plan post the winning videos on the ARNPS web page in November and, at that time, there will be a public announcement of the results. As we announced in the contest rules, we will give you a chance to revise your video for this public presentation. Our committee does not have specific comments for changes; we consider your video very well made. However, you are welcome to make any revisions or updates.

The ARNPS covers significant developments in nuclear and particle science, including recent theoretical developments as well as experimental results and their interpretation, in fields including nuclear structure, collider physics, heavy ion interactions, the physics of neutrinos, the physics of heavy quarks, particle and nuclear physics in astrophysics and cosmology, and experimental instrumentation and accelerator design. We thank you for capturing a scientific concept or idea from nuclear or particle physics on which you are an expert, and bringing its key ideas to a wider audience.

We will run the video contest again next year. We invite you to encourage your colleagues to present their ideas on how new ideas in our field can better be communicated.

Best wishes,

Michael Peskin
